

"Member Spotlight"

On Thursday, February 26, 2009, Safety Council of Northwest Ohio member AAA Standard Services was officially certified as a SHARP company at a ceremony held at their business. SHARP (Safety and Health Achievement Recognition Program) is an OSHA cooperative program that recognizes small employers who operate an exemplary safety and health management system. Acceptance into SHARP by OSHA is an achievement of status that will single out businesses as a model for workplace safety and health.

A SHARP plaque and flag was presented to AAA Standard Services by Greg Collins and Ranzy Brown of OSHA On-site Consultation. Dale Johnson, President of AAA Standard Services accepted the awards along with Steven Johnson, Vice President and Vickey Johnson, Safety Director.

AAA Standard Services employees worked very hard for over two years for this certification and are now recognized as the only SHARP business in Northwest Ohio. In fact, there are only 12 in the State that can say they are a SHARP business. Of that 12, only AAA Standard Services offers Disaster Restoration.

Congratulations to the AAA Standard Services Family!!!

Would you like to share your business' safety accomplishments with the SCNWO membership? If you would, please contact a Safety Council staff member for details.
